

Utilizing Digitalization to Promote the Cross-border Trade Facilitation

July 2024

PRESENTED BY YIN Yunwei

Cross-border Trade Chains

China Customs has fully implemented the initiative of "**Smart Customs, Smart Borders and Smart Connectivity**" ("3S")

CONTENTS

- 1 the digitization of multi-source documents.**
- 2 the parameterization of compliance requirements**
- 3 the digitalization of knowledge and experience**
- 4 the customs intelligent inspection**

01

**Promoting the digitization
of multi-source documents**

Promoting the digitization of multi-source documents

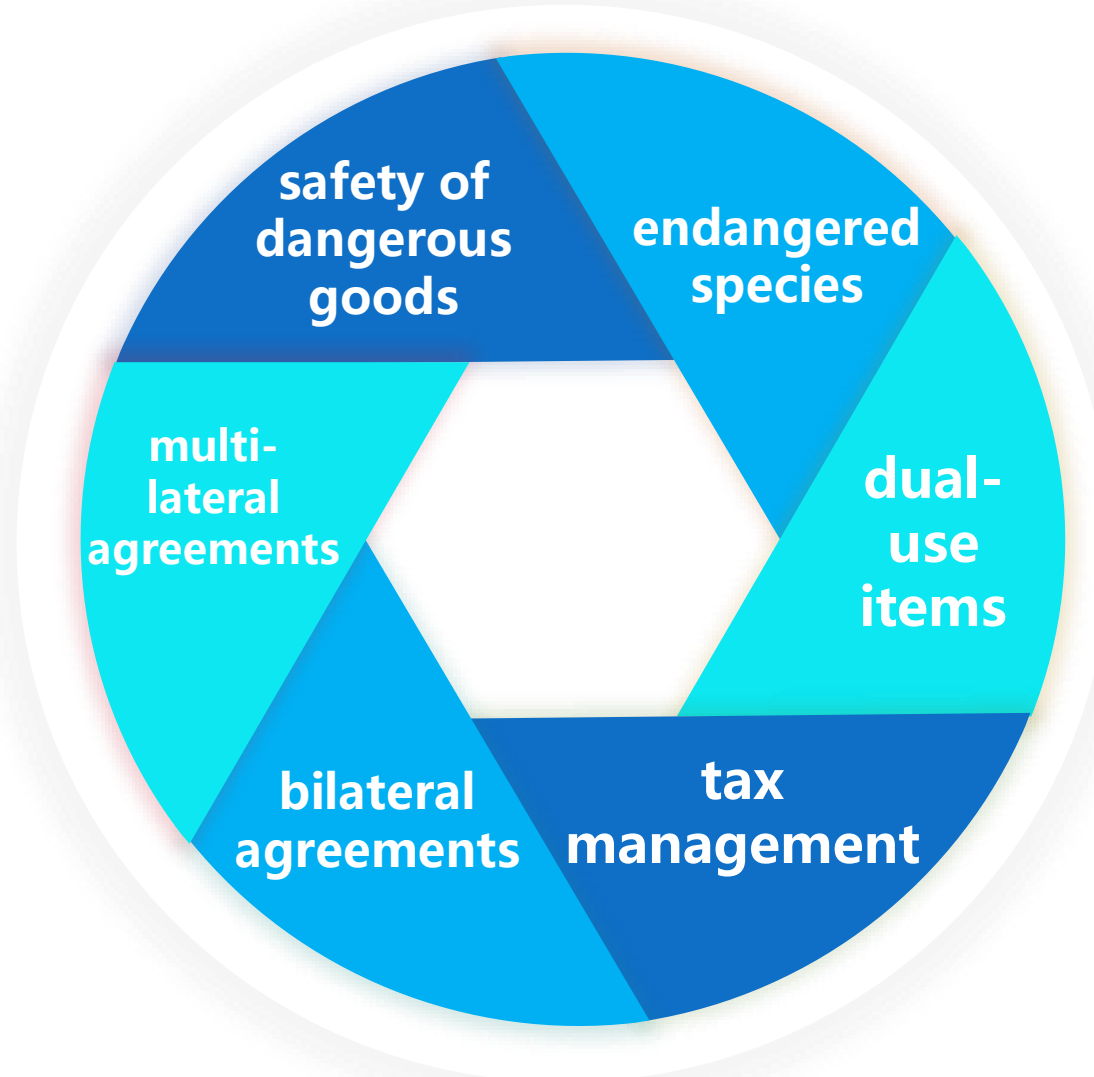

We are going to establish and improve a system for securing customs data; implement a data classification; and make sure that data sharing and opening are done in an orderly and secure manner.

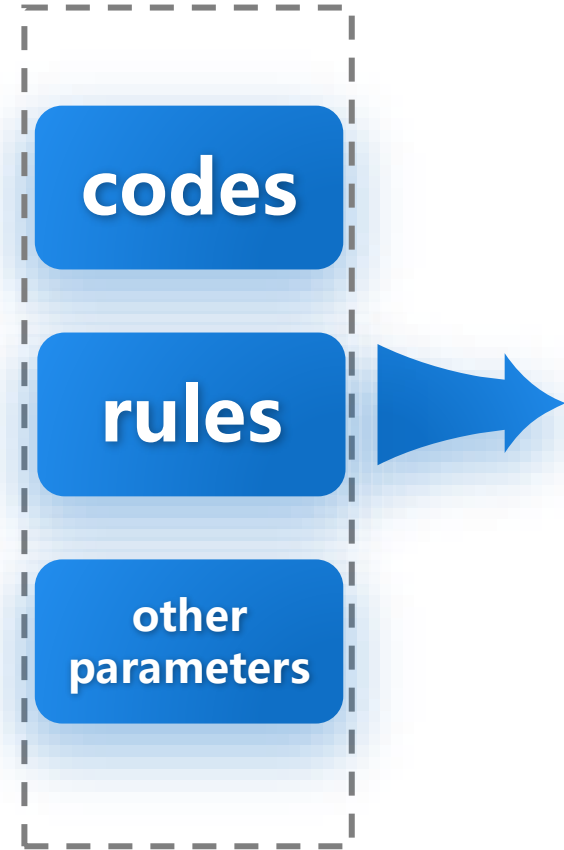

02

Promoting the parameterization of compliance requirements

03

**Promoting the digitalization
of knowledge and experience**

promoting the digitalization of knowledge and experience

evaluation and optimization

on-site feedback

Issues: lack of professionals and the difficulties in passing down expertise and experience of customs
Solutions: extracted, summarized, and transformed the knowledge and experience through digitization
