Assistance required for implementation

• Technical and Financial Assistance to develop ICT (hardware and software) and to implement Single Window
• Technical and Financial Assistance to set up backend system in order to exchange Electronic Sanitary and Phytosanitary (e-SPS) Certificates via National Single Window Routing Platform and ASEAN Single Window Gateway.
• Technical Assistance and Capacity Building for system enhancement and integration of Port EDI System as a part of National Single Window.
• Technical Assistance and Capacity Building on formulating legislative and regulatory framework regarding Single Window.
• Capacity Building for awareness workshops and capacity building programmes.
• Capacity Building for human resources and trainings regarding e-SPS.

Donor Agencies: to be determined

Progress reported

The Blueprint for the Implementation of the National Single Window has been developed in 2018 with the aid of the World Bank Group. According to the loan for Customs Modernization Project that is a part of Myanmar Private Sector Growth and Competitiveness (PSGC) Project proposed by World Bank, US$26.8 million will be cost for the process such as National Single Window establishment, software development, purchasing and installing hardware, building infrastructure, services such as technical advice, strengthening the Customs automation system, management and monitoring process. However, while negotiating with the World Bank Group regarding to get loan, the discussion has been delayed for various reasons. According to the existing Project of Capacity Development for National Single Window and Customs Modernization by Introducing Automated Cargo Clearance System (Phase 2) (2020-2023), a technical cooperation project, Japan International Cooperation Agency (JICA) is planning to set up brief design for National Single Window (NSW). However, the said project is going to be concluded on 30 June 2023 and, we need technical and financial assistance to develop ICT (hardware and software) infrastructure and to fully implement Single Window. Myanmar Port Authority (MPA) implemented Port EDI System in order to operate port related procedures including pre-arrival processing electronically with the Grant Assistance of JICA from 2015-2016 to 2018 2019. At present, MPA still needs TACB for system enhancement and integration with other systems such as MACCS, by which to develop a comprehensive community system that connects all related agencies and stakeholders in line with the concept and principles of implementing National Single Window.

TACB support needs include:

Technical and Financial Assistance is needed to develop ICT (hardware and software) and to implement Single Window. Technical and Financial Assistance is needed to set up backend system in order to exchange Electronic Sanitary and Phytosanitary (e-SPS) Certificates via National Single Window Routing Platform and ASEAN Single Window Gateway. TACB is needed for system enhancement and integration of Port EDI System as a part of National Single Window. TACB is needed on formulating legislative and regulatory framework regarding Single Window. TACB is needed for awareness workshops and capacity building programmes. TACB is needed for human resources and trainings regarding e-SPS.

Donor Agencies: to be determined

Progress reported

In Myanmar, the Transit Trade Procedure has been issued and is still being implemented to be in line with the provisions of TFA and RKC. Myanmar Customs has been developing the ASEAN Customs Transit System to operate in the ASEAN region. With the help of the EU (ARISE PLUS), all is in the hardware readiness of the ASEAN Customs Transit System (ACTS) in August 2020. In June and July 2022, ARISE PLUS had a training session on the ACTS system for the ACTS Central Management Team (CMT) of the ASEAN Secretariat. The CMT team will then resume practical training in Myanmar. In this case, it needs financial and technical assistance to implement ICT infrastructure and technical solutions from international experts. Especially, Myanmar Customs needs a long-term expert in implementing ACTS.

TACB support needs include:

- To provide best practices of customs control in affixing Customs Seals, and designing separate infrastructure (lanes, berth) for transit vehicles
- To provide awareness-raising training and seminar regarding the transit guarantee
- To provide technical assistance for Transit regulation which has been drafted in Myanmar Customs
- To provide capacity building for customs officials in regard to Transit Operations and Controls
- To provide capacity building for customs officials for Transit Cooperation and Coordination among regional and other customs administrations
